Meet Lukas, a wikiHowian of over a year. He enjoys patrolling recent changes, answering questions and editing articles on topics he's knowledgeable about.

**Why they contribute to wikiHow:** "I started contributing during a math class that seemed to drag on for ages as a way to alleviate my boredom. There are multiple things that set wikiHow apart from the other websites I happened to visit that fateful day, and multiple reasons I decided to continue sharing my knowledge, including the fact that my contributions have the potential to help someone and I could learn something while I'm at it. However, the community has to be the number-one reason I still contribute. It's safe to say that I met most of my friends and acquaintances through wikiHow, and the other contributors have provided me with emotional support while still acting as mentors."

**Their advice to new editors:** "If you have information you want to add to an article, go for it! Whether the article has a hundred views or a hundred thousand, you have the potential to help a large number of readers."
